## Pricing Terms and Conditions

**These Pricing Terms and Conditions apply only to Services administered under the TEX-AN NG Contract: DIR - TEX-AN-NG CTSA 005.**

**These Pricing Terms and Conditions are of general applicability except where specific alternative treatment of the subject is stated.**

**Term Requirements:**

1) Non Recurring Charges (NRC) apply for Local Services which are offered on a Month to Month basis.
2) Unless otherwise stated, Non Recurring Charges for all Services, including Smart Trunks are waived contingent upon Customer maintaining Services for period of no less than 24 full months otherwise, the waived installation fees will be recovered by AT&T from customer. This is not applicable to custom, MIS or Advanced Features.

3) Non Recurring Charges may apply for custom, ICB, Emerging Technologies or Advanced Features as defined in the pricing schedule.
4) Managed Internet Service (MIS) Ports and its associated components term is equivalent 24 month minimum term period per line without exception.

Flat rate MIS: rates for the MIS port are contingent on port bundled with access for T1, NXT1, and DS3 access speeds where access is purchased from AT&T (total service bundle required).

MIS Fast Ethernet: Rates for the MIS port are contingent on a bundled offer with the Ethernet access. EAMIS is sold as a total service. Subject to the standard availability and qualification of the EAMIS product as documented in the Guidebook. MIS Fast Ethernet port only pricing can be used whenever the Ethernet access is existing and belongs to the AT&T LEC SBC.

Minimum payment period of 24 months is required on all individual service components of product. Installation charges waived. Full recovery of waived installation fees is required if minimum payment period is not met.

5) Repaying of previously waived installation charges or early service termination cost will not apply to disconnects as an SLA remedy for Chronic conditions as set forth in Attachment D-1 to Exhibit D, Performance Management of the CTSA.

6) Fiber based Services (See Exhibit C / Attachment C-1 Pricing ASE, CSME, Opteman, Gigaman and EPLSWAN) require a 2 year term per individual line / circuit installed. If the commitment time period is not met, the early service termination cost shall be recovery of the previously waived NRC, except for Gigaman. The early service termination cost for Gigaman is 50% of the monthly recurring charges.

7) For rate elements not found in the Pricing Sheets, either Service Guide rates or existing Tariff rates, rules and regulations will apply for all Local Services and all existing services that have been ordered and provisioned prior to the Effective Date of this Amendment. However, in order for a Customer to order rate elements for any other services that are not reflected in the Pricing Sheets, such rate elements must first be reviewed and approved by AT&T and DIR, and added to the Pricing Sheets via execution of a mutually agreed Amendment.

8) Services assume AT&T Texas facilities exist and no special construction will be required. If special construction is required and it results in a higher rate for the specific service, then DIR and /or the Customer, as appropriate, will have the option to accept the new rate or withdraw the request for that specific service.

9) Customer initiated changes to the service delivery model that require changes in the service delivery elements such as central offices, fiber distribution systems, platforms, etc. may result in an adjustment in the Customer price. Example: customer requests copper service delivery changed to fiber and may result in adjusted pricing.

10) Certain products and services that are offered by AT&T are subject to our quality control lifecycle management process. This includes notification of product retirement, sales hold, grandfather date, sunset date and end of life date. AT&T will consult DIR and its Customers to offer migration strategies to the newer emerging

**Term Requirements:**

**LD Voice Rates:** If AT&T's billing system limitations prevent the implementation of net effective rates to the precision shown below, net effective rates may be rounded, not truncated, as necessary to implement rates as accurately as possible. AT&T will notify DIR of any variation in the OneNet rating as stated in the F-18 Billing Plan.

**Local Access:** Non-standard Local Access Pricing has been approved for DS3, OC3, OCX, Fiber/Ethernet based access with the following contingency. Access pricing is being differentiated by In-Franchise (serviced by AT&T) vs. Out-of-Franchise (3rd party providers). Pricing approved is only applicable where AT&T is the Incumbent Local Exchange Carrier (ILEC), where facilities are available, for Local Channels where AT&T Corp or an AT&T Affiliate or Subsidiary owns the facilities form the Customer Premises to the AT&T Central Office. Out of region locations will be reviewed on an ICB basis for pricing.

**Fiber Based Access:** If 3rd party provided service and does not terminate within AT&T POP or AT&T Central Office, customer will be responsible for payment of all 3rd party service surcharges.

**Fiber Based Access:** These rates are contingent upon completion of a facility check. These rates cannot be included in a contract unless the results of a facility check are provided by the account team. If the facility check results in a one-time Non Recurring Charge (NRC), that charge must be included in the contract incremental to the rates stated above.

**MPLS (AVPN):** AVPN discounts authorized when access is provided by AT&T Corp (aka Total Service). Stand alone AVPN port purchase not supported by this pricing agreement. Clear Channel access for AVPN is included in the rates provided.

AT&T is providing a no-cost wireless backup service to the AVPN services provided under the DIR-TEX-AN-NG CTSA 005 between AT&T and Customer. This backup service is provided under the terms of a separate Statement of Work.

Under the terms of the Statement of Work, the supplementary terms for Operation Quality of Services are not part of the standard AT&T VPN back up wireless service offering and will be provided by customized service offering and not by the standard AT&T VPN service team. These supplementary terms for Operation Quality of Service will govern the provision of wireless failover services as described in the Statement of Work and the terms of the AT&T VPN Mobility Features listed in the Service Guide do not apply. The supplementary terms for Operation Quality of Service being provided under the Statement of Work are in addition to those described in the AT&T Business Services Guide for AT&T VPN Services and do not amend or supersede the standard features of AT&T VPN offer, however only the Site Availability SLA will be amended to reflect this custom solution and will supersede how the credit will be calculated based upon a full site outage.

## CO-LOCATION

| | |
|---|---|
| ▪ Co-location Services | ▪ AT&T Co-location Services is a hosting and application services solution that provides conditioned data center space, power, connectivity, and IT support for your hosted IT infrastructure. Co-location Services gives you a highly secure, reliable, and scalable foundation for your infrastructure and applications in an AT&T Internet Data Center (IDC).<br><br>▪ We provide Co-location Services from our 38 IDCs. Because we have so many IDCs and because they're on four continents, we have the global presence to serve multinational corporations whose employees or customers need distributed IT operations or worldwide access.<br><br>▪ In addition, our IDCs' multi-layered security, fail-safe redundancy, and network diversity help protect your system from intrusion or failure. To further support reliable hosting, IDCs guard against fluctuations in, or loss of, commercial power. For example, an uninterruptible power supply (UPS) helps keep voltage consistent. If an outage occurs, on-site batteries support the UPS while we power up generators. For longer commercial outages, diesel generators provide continuous power.<br><br>▪ We complement this infrastructure with redundancy in components and paths to help eliminate failure. As a result, our IDCs historically average over 99.999% availability, which surpasses the typical availability for data centers in their class. So, even in the unlikely event of commercial power loss combined with one or more failures in the IDC, your computing infrastructure continues to run. |

## PORTABILITY

AT&T will provide to DIR for portability allowances up to $10,000 in a single month as a credit to negate normal termination liability charges for service moves that require a circuit to be relocated from one location to another location provided that the circuit disconnect order and new connect orders are issued within 30 days of each other.

DIR may on at least 30 days prior written notice to AT&T, terminate its use of any Service after the Service commencement date but prior to the end of the initial Service term, without payment of any applicable termination liability if:

- DIR places and AT&T accepts an order for a new, replacement Service of the same Service type with equal or greater capacity with a Service Term of not less than the remaining Service term of the Service being terminated.
- DIR pays all non-recurring charges applicable to the replacement service.
- The monthly recurring charges applicable to the replacement Service are not less than the monthly recurring charges payable for the Service being terminated.

**AVPN**

| |
|---|
| **DIR** will:<br>1) Allow on a case by case basis at the agency/customer level, the choice to strategic source and award AT&T as their sole source ATM/FRAME and MPLS (AVPN) provider through 12-31-2014.<br>2) Award AT&T Premium Services. |
| **AT&T** will:<br>1) hold firm the ATM/Frame prices for existing TEXAN 2000 customers through 3-31-2014 for customers that DO opt for AT&T MPLS AVPN if such customers have submitted orders to A&TT by December 31, 2013 and such migration is completed by March 31, 2014. However the ATM/Frame prices will be extended beyond March 31, 2014 in the event the AT&T installation interval for the MPLS AVPN service extends beyond March 31, 2014 due to AT&T's delay.<br>2) hold ATM/Frame prices for existing TEXAN 2000 customers through 3-1-2012 for customers that DO NOT opt for AT&T MPLS AVPN.<br><br>3) Additionally, AT&T will provide for a reasonable transition period of up to two weeks without dual network billing for customers transitioning from AT&T ATM/Frame to MPLS (AVPN). |
| The two week timeframe will begin on the date of installation of the circuit which shall not occur prior to the due date. Should the circuit be installed prior to the due date, the two week period will commence from the actual due date quoted. |
| Opting for AT&T MPLS AVPN was established by Customer submitting a signed letter of declaration indicating the decision to stay with AT&T and to migrate all AT&T ATM/Frame services to AT&T MPLS AVPN services by 12-31-2014. Such signed letter of declaration was delivered to AT&T prior to 12-31-2011. See Appendix C-1 of DIR-TEX-AN-NG-CSA-ICXXX. |

# PRICING WITH DIR COST RECOVERY FEE (CRF)
# (CUSTOMER PAYS THIS AMOUNT)

Cost Recovery Fee = 12%

High Speed services assume AT&T Texas facilities exist and no special construction will be required. If special construction is required and it results in a higher rate for the specific service, then DIR will have the option to accept the new rate or withdraw the request for that specific service.
